1. INTRODUCTION

SCOPE

This document is meant to provide customers with a list of changes for each software bundle release for the PF2150-E BMS Controller. The notes are categorized by their software bundle release version in the form E A.B.C, where:

A: Major Software Release (typically with new features)

B: Minor Software Release (typically with fixes / changes)

C: Build Number (internal use only)

Modification to software is generally split up into three main categories:

NEW: Software modifications that add additional functionality (e.g. features).

CHANGES: Software modifications which modify existing behavior.

FIXES: Software modifications which correct identified issues (e.g. bugs).

KNOWN SAFETY ISSUES

NONE

2. RELEASE NOTES

E 1.3.1

Minor bug fixes. Released Feb 11, 2025.

FIXES

- Fixed a bug on the home screen where setpoint values would be displayed as Celsius values with Fahrenheit units when the system was configured in Fahrenheit.

E 1.3.0

Initial PF2150-E release. Released on December 4, 2024.

NEW

Initial release

CHANGES

Initial release
